DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 21-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hudson et al.

Hudson et al disclose an articulator, which may be formed as one piece. See col. 1, lines 23-24, where it is disclosed that the hinge 13 may be secured to the top and bottom plates 11 and 12, as opposed to being slidably secured thereto. Hudson et al do not disclose upper and lower hinges, but only a single hinge.

It would have been obvious to one skilled in the art to include both upper and lower hinges with the articulator of Hudson et al, as the use of multiple hinges is well known in the articulator art, if greater flexibility and range of motion of the upper and lower models is desired.

Art Unit: 3303

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patent to Morais has also been cited to further show the state of the art.
